U u	/u/	uzas	the "u" in "rude"
Ŭ ŭ	/w/	naŭ	the final "w" sound heard in "ow!"
V v	/v/	voli	the "v" in "vine"
Z z	/z/	zipo	the "z" in "zip"

*these sounds don't occur in English. However, they aren't that hard to master; also, ĥ is very rare in Esperanto, and you probably won't have to worry about it for a while. It's possible to speak the language without dealing with this phoneme. However, r and c are all over the place.

Finally, the stress in an Esperanto word always comes on the second-to-last syllable. This rule is always consistent, without fail. The letters never change their pronunciations — you don't have to worry about "I before E except after C" or anything of the sort.
